SUMMARY

I'm Yomna — a data analyst with a background in education and a growing focus on applied AI. I studied Computer Teacher Education at Damietta University, then moved into data analytics through the Applied AI & Data Analytics Diploma (Digital Pioneers / MCIT). Right now I clean, analyze, and visualize data using SQL, Python, and Power BI. I've processed datasets with 50,000+ records, built interactive dashboards, and delivered insights that directly improved how teams make decisions. I'm currently building depth in machine learning and working toward specializing in applied AI.

WORK EXPERIENCE

Junior Data Analyst

Digilians | MCIT · Cairo, Egypt · Nov 2025 – Aug 2026

- Processed and cleaned large-scale datasets (50,000+ records) using SQL and Python, reducing data inconsistencies by 20%.
- Designed and deployed 5+ interactive dashboards using Power BI, saving stakeholders 10+ hours of manual work weekly.
- Applied statistical analysis and machine learning concepts to real-world problems, achieving 95% accuracy in data forecasts.
- Collaborated with cross-functional teams to deliver 3 end-to-end data projects, improving operational efficiency by 15%.

Data Analyst and Business Data Support

Al Akkad – Fashion Designer · Damietta, Egypt · Aug 2018 – Aug 2019

- Analyzed sales trends and customer preferences across 20+ product categories, helping increase seasonal revenue by 10%.
- Managed inventory data using Advanced Excel, reducing stock discrepancies by 25%.
- Translated raw operational data into 3 weekly performance reports for the management team.
- Identified slow-moving inventory through data analysis, enabling a clearance strategy that recovered 15% of tied-up capital.

SELECTED PROJECTS

1. BankIQ — Banking Database Management System (Data Mining Course Project)

SQL · Microsoft SQL Server · Data Modeling · Excel

Designed and implemented a banking database system with 16 relational tables in SQL Server. Built the full pipeline: schema design, data insertion, complex queries for business insights, and a bilingual documentation system. Presented findings through the BankIQ Integrated Intelligence presentation, covering customer segmentation, transaction analysis, and marketing campaign performance.

2. Integrated Agentic AI System for Plant Disease Detection and Water Resource Management (Graduation Project)

Python · PyTorch · Vision Transformer · MobileNetV2 · LSTM · XGBoost · Agentic AI

Designed an integrated agentic AI system for precision agriculture in Egypt's AI-Maghara region. Combines three AI models orchestrated by an agentic core: (1) Vision Transformer and MobileNetV2 for cucumber leaf disease detection from 4,445 images, (2) LSTM-based early warning using IoT sensor streams, and (3) XGBoost for water quality prediction. Targets 99.39% classification accuracy and deployable on edge devices like Raspberry Pi. Supervised by Dr. Tarek Ghoniemy.

3. Body Performance — Machine Learning Classification

Python · Scikit-learn · Pandas · NumPy · Seaborn

Built a machine learning model to classify body performance levels using health and fitness data. Covered the full pipeline: data cleaning, feature engineering, model training, and evaluation. Experimented with different train/test splits (50/50, 70/30, 80/20) to optimize model performance. Compared regression vs classification approaches for the same dataset.

3. Customer Churn Prediction

Python · Scikit-learn · Machine Learning

A strategic project solving a real business problem — predicting why customers leave. Built using Python and machine learning algorithms to identify churn patterns and the factors most associated with customer attrition.

SKILLS

Data Analysis: Excel · Data Cleaning · Data Visualization · Pivot Tables · Charts · Statistical Analysis · Reporting
Databases: SQL · Microsoft SQL Server · Queries · Data Filtering · Joins
Visualization: Power BI · Dashboard Design · Data Modeling · Seaborn
Programming: Python (Pandas, NumPy, Scikit-learn) · Machine Learning Basics
Soft Skills: Analytical Thinking · Emotional Intelligence · Team Collaboration · Communication · Resilience · Problem-Solving

LANGUAGES

Arabic: native | **English:** Very Good | **Bahasa Indonesia:** Very Good

EDUCATION

Diploma, Applied AI & Data Analytics
Digilians | MCIT (Digital Pioneers Initiative) · Nov 2025 – Aug 2026
Python, SQL, Machine Learning, Deep Learning, and AI Agent Systems.

Bachelor of Science in Specific Education — Computer Teacher Education
Damietta University · 2024
Grade: Very Good (76.78%). Final Project: Excellent (50/50).

CERTIFICATIONS

Google Data Analytics Professional Certificate
Google (Coursera) · 2025 – 2026
Data cleaning, analysis, visualization, spreadsheets, SQL, and dashboards.

VOLUNTEERING

Volunteer
Fund for Drug Control and Treatment of Addiction (FDCTA) · Oct 2020 – Present

- Participated in awareness campaigns and community outreach programs.
- Supported educational activities related to addiction prevention.

Volunteer
Haya Karima Foundation · Apr 2024 – Dec 2024

- Supported local communities and organized outreach efforts.
- Helped with coordination and on-site activities.
